

E-RAKSHAK FORENSIC MALWARE ANALYSIS REPORT

Automated Multi-Modal Triage, Behavioral Forensics & Threat Attribution

1. Sample Identification & File Metadata

SHA-256	daf1bd11551084137586d57718a9f7f66dcde11f2e7699ecafc6d0d21fb03053
MD5	359c2ba083debad37e04962ed6cdd9ac
Platform / Format	MACOS (MACH_O)
File Size	36 bytes
Submission Time	2026-10-05T07:32:25.063953+00:00

2. Threat Assessment & Unified Risk Score

Risk Score	15/100	Verdict / Threat Level	CLEAN (LOW)
Confidence	50%	Assessment Method	Deterministic Weighted Correlation

3. Dynamic Sandbox Execution & Provider Attribution

Provider	native
Task ID	static-only
Execution Status	NOT_SUPPORTED
Forensic Status Line	Dynamic analysis: not performed (static-only)

4. MITRE ATT&CK; Matrix Mapping

No MITRE ATT&CK; techniques observed or mapped for this sample.

5. Grounded Investigation Narrative

[FALLBACK] This macos mach_o binary exhibits no confirmed malicious capability tags. Verified risk score is 15/100 with low victim impact based on verified forensic indicators. Immediate containment and perimeter network monitoring are advised.

6. Actionable Defense Recommendations

• Block file hash SHA-256 daf1bd11551084137586d57718a9f7f66dcde11f2e7699ecafc6d0d21fb03053 across endpoint detection rules and EDR

7. Evidence Chain of Custody & Integrity Verification

Cryptographic Evidence Chain: Verified SHA-256 bindings across ingestion, static analysis, and dynamic telemetry. Artifacts signed with HMAC-SHA256 and verified defensible.
